### **C. J. Enterprises, Inc. Expands Services**

Chattanooga, TN – C. J. Enterprises, Inc. (CJE) a minority, woman-owned and operated company has finalized a Reseller Agreement with Onstream Systems Ltd., the developers of RapidRedact™ software. Onstream Systems Ltd., a New Zealand based software development company with over a million desktops installed worldwide including the USA, the United Kingdom and Asia Pacific.

In today's environment, where striking a balance between transparency and privacy is increasingly challenging for many organizations, CJE has formed a partnership with Onstream Systems Ltd. to provide an innovative solution.

RapidRedact™ provides a fast, simple method of redaction by removing sensitive information from the documents before they are released for publication. The software is able to redact from office documents including Word, PDF's, TIFF, e-mail and other image documents. The redacted documents can be transmitted electronically, secure in the knowledge that all sensitive data, including metadata, has been removed. Developed initially as a Microsoft Windows® plug-in, RapidRedact™ can be integrated with virtually any application. Depending on the usage model required, RapidRedact™ can be configured for use by individuals, small workgroups, large enterprises, and can even be accessed by users who need to do work over the Internet.

RapidRedact™ is scalable for any business size, and can be used for:

- Freedom of Information Act (FOIA) compliance, enabling government agencies and businesses to meet requirements for transparency and privacy
- Protecting proprietary processes, information, and contract terms from unauthorized publication
- Removal of personal or protected data from public records or documents
- Complying with the requirements of Sarbanes-Oxley for financial confidentiality
- Litigation support and discovery

CJE is a Record and Information Management Company that has been assisting their commercial, local, state and federal government customers for over 28 years in managing records and information. CJE offers an array of Information Management Services, i.e. Records Management, Document Conversion Services, Web Design Services, and Business Support Services.
