

# High-Volume Server

**Install today, Redact tomorrow**

Redact information  
in [redacted] electronic  
documents and [redacted]  
completely remove  
hidden data [redacted]

## RapidRedact High-Volume Server (HVS) is an out of the box, 3rd Generation redaction system.

The software is designed for organizations that have high volume discovery redaction requirements. High-Volume Server helps overcome the rising cost of litigation support faced by legal firms and litigation support companies.

### Who uses RapidRedact HVS?

Organizations including Law Firms and Litigation Support Businesses that need to remove sensitive content from briefs, exhibits, divorce decrees, deeds of title, custody documents, writs of garnishment, etc

### RapidRedact HVS automates redaction

- Capable of processing all PDF and TIFF files
- Settings are customizable and can be saved as templates for future use
- Manual reviewing is optional
- Any type of sensitive information can be searched for and automatically redacted
- Folders can be continually watched for new documents that require redaction, eliminating the need to configure new jobs

### Why use RapidRedact HVS?

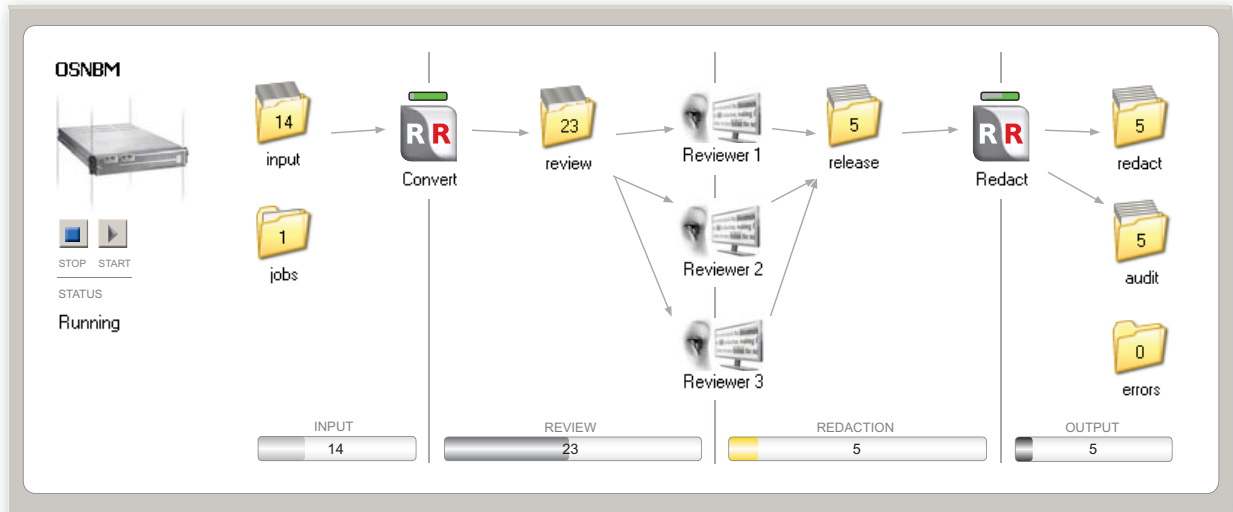

- Cost effective. Efficient in the use of time, money and people.
- Gentle on the environment. Completely paperless process.
- Simple to install and use.
- Secure. Have confidence in the security of your discovery output – present your case knowing that there is no hidden data in the discovered documents.
- Control. Meet your in-house deadlines.
- Completely scalable for small and large volumes at a price that is scalable to your needs and budget.
- Unlimited reviewers - resource the jobs with more reviewers at no cost.
- Minimum training. Redaction and reviewing processes are intuitive – just like having the paper in your hands.
- Compatible. Installs and easily integrates into your existing systems.
- Review and Audit copies of every document are available.
- Easy reprocessing. No need to repeat redaction.

### RapidRedact HVS gives you the ability to:

- Queue, process and redact large volumes of multi-format documents quickly and efficiently
- Transform your document redaction services into profit centres with billing technology
- Reduce the amount of time users spend redacting documents
- Lower the costs of large scale redaction needs
- Install immediately – no development required
- Automate the redaction process for large batches of mixed document types
- Assign unlimited reviewers
- Create a new, redacted rendition of the file as PDF or TIFF. The original document remains untouched.

*Handles thousands of documents...and documents which are thousands of pages long.*

## RapidRedact HVS Process Flow

### RapidRedact HVS

**Input**

Manages documents that are submitted for processing

**Queuing**

Manages job input and output priority

**Reviewing**

- Documents can be assigned to designated users for reviewing
- Original document is retained without changes

**Output**

Finalized redacted documents are saved to a user specified directory

- An additional translucent copy is saved for audit purposes

### RapidRedact HVS features

- Allocate reason for redaction (exemption codes)
- Save an audit trail for legal purposes
- Automatic text search
- Bracketed text removal
- Automatic word removal
- Works across multiple pages and columns
- Specify your redaction targets:
  - Assign exemption codes
  - Auto redact social security numbers, email addresses, credit card numbers etc.
  - OCR image areas in documents
  - Specify interpreting application (eg. retain headers and footers in MS Word)
- Document integrity and spoliation – The original document file is opened and closed without making any changes.

**Requirements**

- Windows Server 2000, 2003, 2008 or Windows XP, Vista
- .Net Framework 2.0
- A Microsoft Domain is required for a networked installation
