

**Document
imaging as if
the paper was
in your hands!**

- Annotate documents in your favourite way – anything is possible - sticky notes, handwriting, highlighter annotations, text, pictures, arrows, etc.
- Put hand-written comments, remarks or drawings directly on the image using a pen and save changes on the image.
- Customize and personalize the document with templates, frames, stamps or overlays.
- Catalogue and navigate the files using bookmarks.
- Create, search, edit bookmarks to organize image-data set in the best possible way.
- Thumb through electronic pages as if you had a paper folder in your hands.
- Measure distances, angles, areas on the screen as you would do it on the paper.
- Print to original size over multiple pages on your A4 printer.
- Print to scale.
- Print the selected area and title the print out.
- Print out a range of pages by selecting a thumbnail.
- Copy multiple image areas to a Trapeze pasteboard or to the Windows clipboard.
- Copy or print a contained document by selecting a bookmark.
- Handle enormous (100s of MB), mixed black and white and colour images, and big files (3,000+ pages) easily and fast.
- Insert extra pages to the existing folders.
- Scan images directly to the right folders using barcode separation sheets.
- Email any image or file you wish directly from Trapeze Desktop.

Trapeze Desktop has evolved far further than most image viewers. It provides a comprehensive imaging solution, which enables users to work with electronic documents in exactly the same way as they work with paper files.

Trapeze Desktop is an excellent solution for organizing and sharing large numbers of documents in any office or bureau. Easy and quick access to the stored information helps companies to save time and money, reduces the frustration of employees and simultaneously improves the quality of service provided.

Trapeze Desktop easily integrates into your environment:

Windows XP and Vista compatible and is also available as various Plug Ins e.g. including Java, Visual Basic, C, C++, Powerbuilder, Internet Explorer, Netscape and many more.

Trapeze Desktop is Microsoft compliant real time "Active Document Server". Internet Explorer displays images using Trapeze Desktop technology. Trapeze Desktop's ODMA support facilitates an easy to use integration of Trapeze Desktop with most document and record management systems.

Trapeze Desktop supports TWAIN and MS 61 (ISIS compatible) scanning software and recognizes all common barcode standards.

Trapeze Desktop technology supports image files in any popular image formats e.g. TIFF, GIF, PCX, BMP, PNG, PDF, DWG, DXF and JPEG compressed files etc.

No matter whether you have 10 or 20,000 employees, Trapeze Desktop has the functionality needed for them to work with electronic documents in the most effective way. Get the benefits of electronic documents whilst maintaining the familiar use of working with documents in your hand!

**“ Her Majesty’s Land Registry goes Online
Users can now access and download accurate title plans and registry information, including the value of the property - all in a matter of minutes compared to the several weeks it would have taken using traditional means.**

The Trapeze viewer has proved to be an important component, and its accurate scaling and measuring capability has been invaluable. The system is very speedy and provides us with greater flexibility than ever before.

**Mr. Brian Barrett
Business Development Manager
HMLR**
